فيلدز FIELDZ

Simplest way to book
a sports field

- **Overview:** Fieldz is a mobile application designed to address the common issue faced by sports enthusiasts and field owners: finding suitable fields and connecting with potential customers. The app enables field owners to list their facilities, while sports enthusiasts can easily search and reserve their desired fields.
- **Techniques:** We've structured our app with the objective of finding a solution to the commercial and modern aspects of the world of sports around us, following different techniques such as User Story Mapping, Prototyping, CI/CD, API Integration and Accessible Design.
- **Outcomes:** The Fieldz app allows users to conveniently find variation of sports fields through various methods and discover nearby sports events. The app also supports field owners by connecting them to their audience with the ease of field management.
- **Conclusion:** The Fieldz app is a bright valuable resource that plays the role of one of a kind central hub for both individuals seeking sports fields and owners looking to attract renters. With its potential to connect sports enthusiasts and athletes to undiscovered fields in their area, the app inspires more people to engage in the diverse world of sports.
- **Acknowledgment:** We extend our sincerest gratitude to our advisor, Dr. Jameleddine Hassine, for his invaluable guidance and support throughout our project. We also thank King Fahd University of Petroleum and Minerals for providing the necessary resources and suitable environments. Our gratitude extends to our colleagues, friends, and families for their unwavering support.
